Application/Control Number: 10/675,731

Art Unit: 1755

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a process of catalytic combustion, classified in class 423, subclass 650+.
- II. Claims 16-23, drawn to a method of dispersing a noble metal catalyst, classified in class 502, subclass 300+.
- III. Claims 24-35, drawn to substance/catalyst for catalytic combustion, classified in class 502, subclass 325.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and modes of operation. Invention I functions as a catalytic combustion process, whereas Invention II functions as a process for dispersing a catalyst..
- 3. Inventions I and III are related as product (Invention III) and process of use (Invention I). The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in another and

Application/Control Number: 10/675,731

Art Unit: 1755

materially different process, such as a process for treating exhaust gases, or a process for the chemical hydroconversion of hydrocarbons (cracking, reforming, etc.).

- 4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together, in that the catalyst disclosed in Invention II does not have all the limitations of the catalyst/substance of Invention III. Further, the different inventions have different functions, as Invention II is directed to a method of dispersing a catalyst, whereas Invention III is directed to a materially different catalyst/substance.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to Patrick Bever on August 10, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicants' counsel requested that the restriction be mailed.

Application/Control Number: 10/675,731

Art Unit: 1755

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Priority

8. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/777,488 (now abandoned); said application and the Priority Document were both filed on February 5, 2001.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia L. Hailey whose telephone number is (571) 272-1369. The examiner can normally be reached on Mondays-Thursdays.

Art Unit: 1755

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark L. Bell can be reached on (571) 272-1362. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group 1700 Receptionist, whose telephone number is (571) 272-1700.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
